

SEPSIS TECH & INNOVATION 2021

Inspiring Breakthroughs in Care

A VIRTUAL CONFERENCE

JUNE 22-23, 2021

SEPSISTECH.ORG

Presented by Sepsis Alliance, the nation's first and leading sepsis organization working in all 50 states to save lives and reduce suffering by improving sepsis awareness and care. Learn more at Sepsis.org.

Following the success of the inaugural Sepsis Alliance Summit in 2020, Sepsis Alliance is proud to announce the inaugural **Sepsis Tech & Innovation Conference.**

Engage with the nation's leading innovators, clinicians, investors, and policy makers to discuss health technology and innovation, and its tremendous potential to reduce the burden of sepsis.

The Audience:

- Industry leaders
- Public policy experts
- Health and hospital leadership
- Health quality and decision support leaders
- Health investors and venture capitalists
- Health and technology media
- Health advocates
- Health advisors
- Health educators
- Health marketers

Conference Objectives:

- Bring all aspects of sepsis technology development together with clinical leadership to better connect ideas, products, and implementation to improve patient care across the continuum
- Bring focus to the huge market opportunity in sepsis diagnostics (projected to grow to \$1.13 billion by 2027) and therapeutics (projected to reach \$3.7 billion by 2025)
- Explore the opportunities for great forward leaps in the prevention, diagnosis, and treatment of sepsis
- Make **Sepsis Tech & Innovation** a can't miss virtual conference

Expected Attendance:

2,000+

Burden of Sepsis:

- Sepsis is the #1 cause of death in U.S. hospitals - one in every three deaths
- Sepsis is the #1 cost of hospitalizations in the U.S. - \$52 billion/year
- Sepsis is the #1 cause of re-hospitalizations in the U.S. - 40% within 90 days
- Sepsis is a leading cause of COVID-19 deaths
- Sepsis kills more children than cancer in the U.S.
- Infection/sepsis is the #3 cause of maternal mortality in the U.S.
- As many as 80% of lives lost to sepsis could be saved with rapid diagnosis and treatment, like the kind we'll be discussing at **Sepsis Tech & Innovation**

Conference Description:

- Engage with the nation's leading innovators, clinicians, investors, and policy makers to discuss technology and innovations to help reduce the burden of sepsis and COVID-19
- From prevention to diagnostics to virtual care to therapeutics, listen to experts share promising solutions
- Hear where the market is headed and where leading investors are placing their bets
- Learn how technology and innovation can help with inequality of sepsis care and outcomes
- Explore how big data and AI can be leveraged to improve care and equity
- Learn about the role of innovation to address antimicrobial resistance (AMR)

Sepsis Tech & Innovation

June 22-23, 2021

Leading Edge Sessions and Speakers

Planned Sessions*:

- Government Role in Healthcare Innovation
- Driving Diversity, Equity, and Inclusion in Health Tech Investing and Development
- Data and Quality Initiatives: Addressing a Costly and Deadly Condition
- Disruptions in Healthcare: Who Will be the Next Winners and Losers?
- Public Policy: Saving Lives with Data
- Rehab Tech: From Wooden Legs to Robotics
- Innovations in Diagnostics: Taking the Guesswork Out of Sepsis
- Saving Lives and Money: Public - Private Data Partnerships
- Integrating New Technology and Innovation into Sepsis Care
- And more!

*Subject to change

Invited Speakers From:

- BARDA
- CDC
- HCA
- Jefferson Health
- Johns Hopkins
- Providence Health
- Stanford
- Tenet Health
- United Healthcare
- University of Michigan
- UPMC
- Additional industry, healthcare, investor, and government leaders to be announced
